

MEDACCESS AI | INSTITUTIONAL HEALTHCARE POLICY

Official Policy Code: POL-EMRG-2026-V1 | Effective: January 1, 2026

Emergency & Acute Inpatient Trauma Relief Policy

CLINICAL CATEGORY

Medical Emergency & Inpatient Care

MAXIMUM BENEFIT CAP

INR 2,50,000 per incident

1. Policy Scope & Purpose

This institutional policy provides immediate copay assistance and full financial relief for acute medical emergencies, polytrauma, Intensive Care Unit (ICU) admissions, and urgent surgical interventions. It is designed to ensure no student or registered patient suffers delayed acute clinical triage due to out-of-pocket payment constraints.

2. Eligibility Criteria & Triage Severity

All registered students, staff members, and enrolled hospital patients classified under Emergency Severity Index (ESI) Levels 1 (Resuscitation) and 2 (Emergent) qualify for 100% immediate copay grant approval. ESI Level 3 (Urgent) admissions qualify for up to 85% relief subject to institutional bed availability.

3. Covered Services & Expense Categories

- Emergency Department triage, resuscitation, and monitoring.
- ICU / CCU inpatient room charges, ventilator management, and life-support systems.
- Emergency surgical procedures, orthopedic trauma reductions, and trauma anesthesia.
- Blood transfusions, plasma expanders, and emergency intravenous medications.
- Emergency ambulance transport and paramedic inter-facility transfers.

4. Benefit Maximums & Disbursement Protocol

The maximum assistance payable under this policy is INR 2,50,000 per emergency incident. Claims processed via MedAccess AI with valid hospital admission receipts, clinical triage records, and discharge summaries are auto-disbursed directly to the healthcare provider or reimbursed to the patient within 15 minutes.

5. Exclusions & Limitations

Elective cosmetic surgeries, non-emergency pre-existing outpatient consultations, and unverified private luxury suite upgrades are strictly excluded from emergency pool relief.
